Container lifting lugs for top lifting WLL 56 tonnes

To suit standard ISO corner boxes.

INTRODUCTION

Products of Columbus McKinnon Corporation Limited have been built in accordance with the state-of-the-art and generally accepted engineering standards. Nonetheless, incorrect handling when using the products may cause dangers to life and limb of the user or third parties and/or damage to the hoist or other property.

The operating company is responsible for the proper and professional instruction of the operating personnel. For this purpose, all operators must read these operating instructions carefully prior to the initial operation.

These operating instructions are intended to acquaint the user with the product and enable him to use it to the full extent of its intended capabilities. The operating instructions contain important information on how to operate the product in a safe, correct and economic way. Acting in accordance with these instructions helps to avoid dangers, reduce repair costs and downtimes and to increase the reliability and lifetime of the product.

The operating instructions must always be available at the place where the product is operated. Apart from the operating instructions and the accident prevention act valid for the respective country and area where the product is used, the commonly accepted regulations for safe and professional work must also be adhered to.

Further information and operating instructions are to be found at www.camlok.co.uk

FITTING INSTRUCTIONS:

Self locking and suitable for shackling direct to 4 vertical slings. These lugs are used for lifting with a spreader frame and do not project over the container.

- DO NOT use with 4 leg slings

1) Offer the lug into the slot.

3) Turn the lug through 90°.

2) Enter the lug to its full depth.

4) The lug is now locked in its lifting position.

• REVERSE THESE OPERATIONS FOR THE REMOVAL OF THE LUGS

The working load limit per set of 4 lugs is 32 tonnes at a maximum angle of inclination of 50° from vertical. The working load limit is 40 tonnes at maximum angle of inclination of 36° from vertical. The working load limit is 50 tonnes when used vertically.

Check the marking on the lug. Each lug will be stamped with the maximum load and the angle of working for the set.

The degree of inclination permits the lifting of all but the largest containers with a simple beam.

These lugs cannot drop out when the slings become slack.

Lugs are handed left and right -

- Left hand lugs are marked with an 'L'
- Right hand lugs are marked with an 'R'

- **Container lifting lugs for bottom side lifting**
